

Crook Primary School

Cloud Based Services

The school uses cloud based service providers to facilitate access to resources and other services that are provided online. Use of these services allows us to...

- support our pupils' learning
- monitor and report on their progress
- provide appropriate pastoral care

As a result of using these services data will be stored and/or transmitted between the school and the provider. Before using these services the school will undertake a risk assessment to ensure that the data will be handled in accordance with our policies and current data protection legislation. We will also restrict the amount of data that we store in the cloud to the minimum required to provide or use the service.

Additional information about the cloud service providers that we use will be published and updated on our website at <http://crookprimary.org.uk/privacy>

Parents are asked to provide consent to the use of these services by completing the form below. Parents may choose to not provide consent to any or all of the services. Where a parent opts out of a service the school will do all that we reasonably can to provide an offline alternative.

If you do not complete the form we will assume that you have not given consent and your child's data will not be used on these services.

Cloud Services Consent Form

I consent to my child's data being used with the following cloud based services...
