

Biometric Data Statement

Last reviewed on: June 2024

Next review due by: June 2024

At Crook Primary School we do not use, process or store any biometric data.

Additionally we make every effort to ensure that any 3rd party services that we use will also not use any biometric data for our students, staff or parents. If any of these providers allow use of biometric data then we will include that information in the relevant privacy notice.

If our policy on biometric data use changes for students then we will seek individual consent from parents/guardians before using a child's biometric data.
